1 Purpose

The purpose of installing the Omnivox emergency measures application is to quickly transmit a message for different emergency situations (e.g., fire, earthquake, presence of an active shooter or toxic leak contamination). Instructions will then be given to you according to the situation.

2 Prerequisites

- A. Be part of the student community or be employed by the Cégep de la Gaspésie et des Îles.
- B. Download the **Omnivox mobile** app from your app store, such as Google Play or App Store.
- C. Install the **Omnivox mobile** application.

3 Logging into your Omnivox mobile account

- A. Open the Omnivox mobile application.

- B. If this is the first time you have opened the mobile application, log in.

C. Choose your user status.

D. For students:

Enter your seven-digit administrative file number (example: 2012346) and your date of birth, then press the login (Connexion) button.

Setup Guide

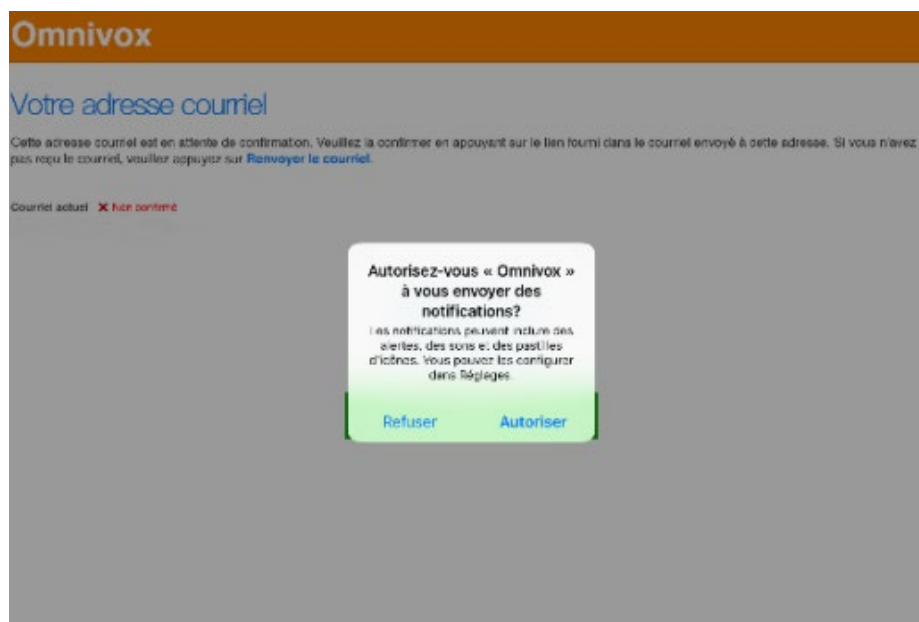

E. For staff:

Enter your five-digit employee number (example: 12345) your usual password, then press the login (Connexion) button.

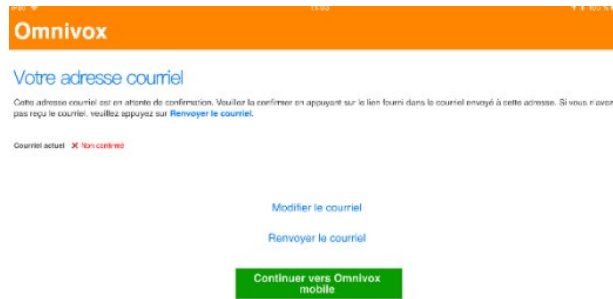

F. For Apple products:

When prompted, press "Allow" (Autoriser) so the application can send notifications to your device.

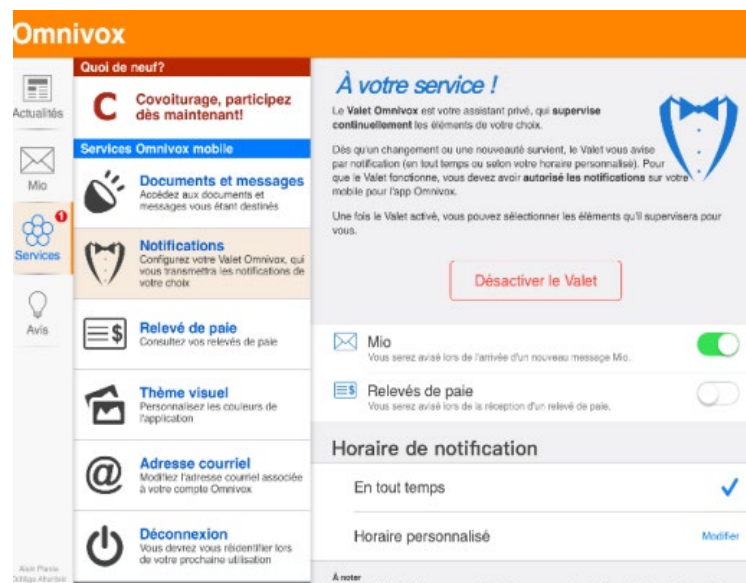

4 Validating the email address

- A. Validate the email address set up for the account. Be sure to enter the address you use most frequently and confirm it via the email that was sent to you.

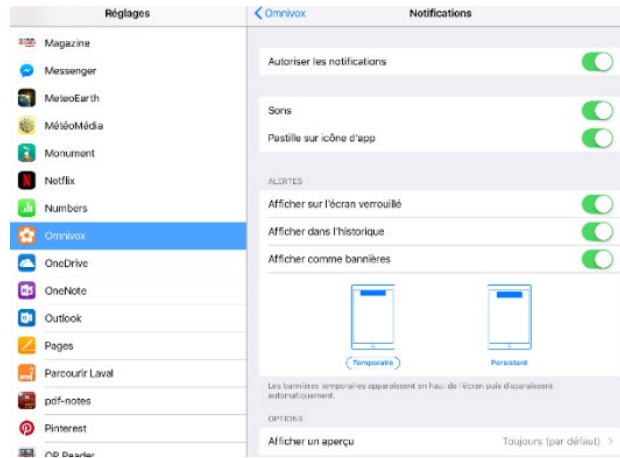

5 Checking if notifications are enabled

- A. The Services > Notifications menu allows you to check that the Ominvox Valet is activated. The Services > Email Address menu lets you check the email address linked to the account.

B. For Apple devices:

To turn notifications back on, use the following path from the settings menu: Réglages > Omnivox. Press the box to enable notifications.

C. For Android devices:

To turn notifications back on, use the following path from the settings menu: Réglages > Notifications > Omnivox. Press the box to enable notifications.
